

LIFELINE®

Rescue Tools

Engineering Innovative Devices For High-Performance Rescue and Personal Safety Applications

Firefighting
Military / Law Enforcement
Scuba Diving
Oil Rigging / Mining
Utilities
Commercial Fishing

LIFELINE® specializes in the design and manufacture of high-performance specialty tools for firefighting, scuba, military, law enforcement, and commercial applications. LIFELINE® offers a collection of one-of-kind devices manufactured with unique coatings, materials, blade thickness, and proprietary serrations. This marvel of engineering science can cut through the most challenging materials. It's not a knife, not a cutting tool... it's a LIFELINE® Rescue Tool.

LIFELINE FIRE™

FIREFIGHTING - GEN 3 FIRE™

The original FIRE™ Rescue Tool is a one-of-a-kind device designed by firefighters to protect firefighters. This handheld tool is uniquely versatile with highly aggressive patent pending serrations. The new GEN 3 FIRE™ features ultra-bright fluorescent properties for increased visibility and BlackCat™ coating for increased durability. The fluorescent raw materials used to make the GEN 3 FIRE™ is 100% compatible with the DuPont Zytel® heat resistant thermoplastic that is at the heart of Lifeline's handles and sheaths. The upgraded tool also features a redesigned triangular breaker blade to increase the speed and effectiveness when creating starter hole to cut laminated glass.

The GEN 3 FIRE™ is a proven portable military-grade cutting machine, far more useful than single-purpose tools

- 100% American Made 440c Steel
- Heat Resistant Injection Molded Sheath and Handle With DuPont Zytel with 572 degree F Melting Point
- Highly Aggressive Serrations 3/16" Thick Robust Steel Ideal For Cutting, Prying and Breaching
- Designed to Meet or Exceed NFPA 1982
- Innovative Sheath is engineered to provide Single-Handed Operation
- Multi-purpose features provide the capabilities of 5+ Tools in One handheld Device
- Redesigned triangular breaker blade for Increasing speed and effectiveness when creating starter hole to cut laminated glass

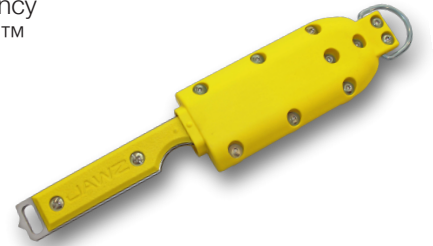

LIFELINE JAWZ™

SCUBA DIVING - JAWZ™ 2.0 TITANIUM

For life-saving, low and high visibility, emergency and underwater survival situations. Engineered from the original LIFELINE FIRE™ tool, JAWZ™ 2.0 is the only underwater self-rescue tool of its kind. From ice diving to tough underwater urban environments, JAWZ™ 2.0 performs exceptionally well. Ultra-Bright fluorescent handles and military blackout options make it the perfect tool for underwater life-saving, low visibility, emergency and survival situations. We offer a premium upgrade called the JAWZ STEALTH. It features BlackCat™ Coatings and Blackout effects for military applications. Features and highlights include:

- Grade 38 ATI 425 Titanium Alloy
- Corrosion Resistant ThermoPlastic Sheath With Innovative Single-Handed Release
- Innovative Cutting Surface Comprised of a Highly Sharpened Blade Area that Blends Into Aggressive Serrations and cutting surface on the spine of the tool
- Specifically designed to easily cut through all materials commonly encountered underwater, such as fishing line, netting, rope, etc.
- Lifeline's Own Ultra-bright Fluorescent Yellow and Pink Handles

JAWZ™ 2.0 TITANIUM STEALTH includes all features above plus:

BlackCat™ Coating for increased durability, premium stainless steel hardware powder coated for 'Black-Out' effect and superior corrosion resistance and 'Black-Out' handle made from injection molded DuPont Zytel material to complete the sleek stealth-like design.

LIFELINE STEALTH™

Military & Law Enforcement - GEN 3 STEALTH™

For confined, low visibility emergency and survival situations. The STEALTH Tactical Rescue tool was engineered from the original LIFELINE FIRE™ rescue tool and field tested by an international military special forces team. STEALTH is a highly aggressive tool by design, features Military Grade Blackout and comes with the LIFELINE® sheath, which offers various access points and smooth one-handed disengagement without any mechanical manipulation.

- Highly Aggressive Innovative Serrations
- Corrosion Resistant ThermoPlastic Sheath With Innovative Single-Handed Release
- Blackout Sheath and Handle With Injection Molded DuPont Zytel
- BlackCat™ Coating For Increased Durability and Black-Out Effect
- Blackout Hardware Components for Complete Stealth-Like Appearance

LIFELINE SUPPRESSOR™

Oil Rigging & Utility - SUPPRESSOR™

With spark suppression and non-conductive rubber electric-insulation, Suppressor™ is a highly innovative rescue tool for the offshore oil, mining and the utility industries. It features specialized spark suppressant technology and non-conductive rubber, electrical-insulating handles to reduce the chance of electric shock when working with or near electrical current or live wire.

Suppressor™ features:

- Lifeline® Patent-Pending Highly Aggressive Serrations
- Grade 38 ATI 425 Titanium Alloy For Spark Suppression
- Rubber Thermoplastic Sheath With Single Handed Release
- Non-Conductive Rubber Electric-Insulating Handles

**To reduce the chance of electric shock injuries Lifeline® recommends using the SUPPRESSOR™ with both ASTM compliant electrical-insulating gloves AND leather protectors.*

LIFELINE TRITON™

COMMERCIAL FISHING - TRITON™

Corrosion resistant for salt-water applications and patent-pending one-handed quick release sheath, the LIFELINE Triton™ is perfect for commercial fishing applications. Drawing directly from the Lifeline Jawz™ technology, Triton™ includes titanium alloy for rust-proof resistance in saltwater environments, ultra-bright is specifically Fluorescent properties for improved visibility in day time or night time conditions. Tritan™ comes with our patent pending sheath offering various attachment points and one-hand operation without any mechanical manipulation. The quick release feature protects commercial fisherman from dangerous entanglement situations allowing them to cut themselves free before getting dragged overboard.

The Triton™ features:

- Lifeline® Patent-Pending Jawz™ Series Serrations
- Grade 38 ATI 425 Titanium Alloy For Corrosion Resistance
- Ultra-bright Fluorescent Rubber Thermoplastic Sheath With Single Handed Release
- Ultra-bright Fluorescent Rubber Thermoplastic handles
