

LAW ENFORCEMENT

SAVING LIVES BY DESIGN

KEY PERFORMANCE CAPABILITIES AND PARAMETERS

FIELD APPLICATIONS:

MVA OPERATIONS

Laminated windows

Seat belts

Front and side Air bags

Carpets

Upholstery

K-9 ENTANGLEMENTS

The LIFELINE STEALTH™ is a powerful, portable, all-in-one rescue tool for law enforcement professionals.

The tool is designed to improve personal safety and tactical effectiveness, allowing law enforcement professionals to take immediate action during unexpected emergencies.

DOT Mandate Impacts ALL Police Officers

New ejection mitigation law requires automakers to make side windows from laminated glass, making **existing window breakers obsolete.**

NHTSA/DOT MANDATE KEEPS PASSENGERS SAFE INSIDE VEHICLE BUT MAKES IT HARDER TO GAIN ENTRANCE TO AN AUTOMOBILE.

Since 2017 one in three cars has been manufactured with side laminated windows. NHTSA mandate (fully implemented in 2020) requires all U.S. automakers to manufacture side windows from laminated safety glass. While this mandate helps to keep drivers safely inside their vehicle during a motor vehicle accident, it makes it challenging for first responders to take immediate action at the scene of an MVA or water entrapments and car fire entrapments.

Advanced window breaker to create starter hole.

*Patent Pending
Aggressive Serrations*

Automobile/Accident Data

- 1 in 3 cars already has laminated side windows
- 336M vehicles in US
- 17M new vehicles per year
- 6.76M U.S. car crashes
- 2.74M US car crash injuries
- 38,000 car crash deaths
- 1.35M deaths worldwide
- Medical Emergencies
- Child Hot Car Death:

Since 1990, nearly 1,000 children have died in hot cars. On average, 39 children die in hot cars every year in the U.S.

STEALTH SERIES

STEALTH™ Police Options & Specifications

STEALTH BLACK | STEALTH VIPER | STEALTH THIN BLUE LINE

This tool is available fully blacked out or with a Thin Blue Line. The device is designed to handle unexpected cutting situations including laminated front and side windows. It's also highly effective for prying, K-9 missions and entanglement situations.

More effective than single purpose tools, the highly aggressive serrations are able to cut almost anything a law enforcement professional will encounter in the field.

Dupont™ ThermoPlastic™ handles and sheath are heat resistant to 572 degrees. Patent pending serrated blade features BlackCat™ Coating for increased durability and overall black-out effect.

Product Details

Blade Specification:

- Size - 3/16" Thick Laser Cut Blade
- Material - 100% American Made 440c Steel
- Highly Aggressive Patent-pending Serrations
- BlackCat™ Coated for Durability and Corrosion Resistance
- Thin Blue Line Option on BlackCat™ Blade and Sheath.
- Aggressive breaker at the back of the tool, highly effective against laminated glass and creating starter holes before cutting.

Sheath and Handle Specifications:

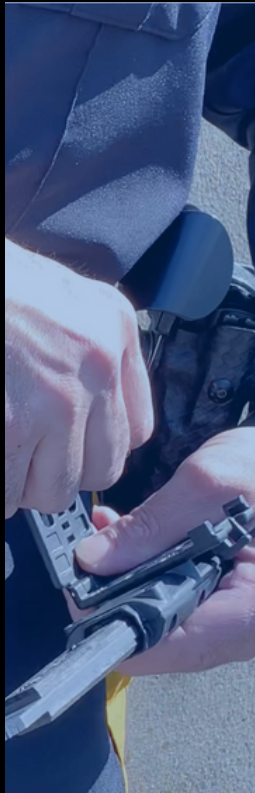

- Heat Injected DuPont™ Zytel® ThermoPlastic™ - Heat Resistant to 572 Degrees Fahrenheit
- Available in Black, Viper and Thin Blue Line

Hardware:

- Black Oxide Hardware
- D-ring

Price: \$189.00 USD
